## Donana International Ltd.

was founded in 2006 by Donn and Anna Simon.

Donn Simon, Our President and Co-founder, has over 40 years of experience in the Mining and Construction Industry. He has worked in both "hands-on" and supervisory positions all over the world.

Our company provides expert knowledge, experience, and consulting services for mining operations and equipment purchases, as well as consulting on large construction projects for both private and government enterprises.

We are authorized by OSHA and MSHA to conduct 10 hour and 30 hour safety training courses for General Industry, Construction, and Maritime Operations.

[www.donana.net](http://www.donana.net)

Mr. Simon has spent many years on long term international projects. (Long term is defined as 6 months to more than 4 years continually on a site.)

These locations include the following:

- UK, including separate sites in England, Scotland and Wales
- Canada, including separate projects in the provinces of New Brunswick, Saskatchewan, Alberta and British Columbia.
- Turkey
- Jordan
- Morocco
- South Africa
- Namibia
- Russia

Shorter term projects for repairs or marketing projects have been completed in the following locations:

- Canada: Yukon, Quebec and Labrador
- Brazil
- Nicaragua
- Tunisia

## Services for Mine Owners

Is your company contemplating purchasing a new dragline or large shovel, or relocating a used one? If so, there are logistic and communications problems which require constant attention from the owner to protect their investment and give them the most return on their major cash outlay. Often, a mine must reassign an employee to be their eyes and ears during the project. This may remove a valued employee from other duties that they are best suited for. Donana International Ltd has the experience and expertise to act as a temporary contract representative to aid the owner during this project. Donana is well qualified to speak directly with the equipment OEMs and with the contractors who normally take on such projects, both domestically and internationally. Hiring Donana will allow the owner to continue their normal business routine and to receive continual detailed reports on problems and progress. Donana International Ltd is well acquainted with the OEMs and the major suppliers of after market parts and will assist in obtaining parts required for a smooth transition.

## Services for Construction Projects

Donana International Ltd was selected as one of the independent monitors for a \$4.45 Billion project for a 2 year contract period. Donana was present on the site when any work was performed in the areas of interest assigned. Daily reports were supplied to the state government agency that provided funding for the project.

Donana International Ltd has worked with international project owners and contractors, as well foreign government agencies (some requiring liaison with the World Bank to monitor expenditures, progress and quality).

Our team at Donana International Ltd is well qualified to perform monitoring and contract supervision for Maritime Construction Projects, or projects in any location. Please give us a call to schedule a meeting to discuss how we can help!

## Safety Training Services

Donana International Ltd is authorized to teach 10 and 30 hour OSHA Safety Classes for the Construction Industry, Maritime Industry, and General Industry Sectors. Donana is also an authorized instructor for MSHA for part 46 & 48.
